10K Takes - Daily Content Report

REPORTING DATE: WEDNESDAY, NOVEMBER 11, 2026

YESTERDAY AT A GLANCE

Unavailable	4	Not reported
All-account impressions	Posts published yesterday	Performance score
No complete account-wide daily source	Across 4 platforms with a saved snapshot	Incomplete cross-platform coverage

Activity window: Nov 11 12:00 a.m. to Nov 12 12:00 a.m., America/Chicago. Exact account-wide activity is unavailable. Platform totals are matched-post counter changes between daily captures; a brief collection delay may cross midnight. Posts published yesterday show their cumulative post totals at the next-morning capture. The 30-day publication feed does not include every older post.

Yesterday's executive diagnosis

Fictional sample only. This preview demonstrates the report layout and makes no claim about actual account performance.

Yesterday's Performance Scorecard

Platform	Yesterday's impressions / views	Expected baseline*	Delta*	Yesterday's signals
Instagram	62,000	Not available	Not available	Tracked-post counter change; not an account-wide total
Facebook	90,000	Not available	Not available	Tracked-post counter change; not an account-wide total
TikTok	8,000	Not available	Not available	Tracked-post counter change; not an account-wide total
X/Twitter	Not available	Not available	Not available	No matching post counters in both snapshots
YouTube	3,000	Not available	Not available	Tracked-post counter change; not an account-wide total
Threads	Not available	Not available	Not available	No matching post counters in both snapshots

*Historical comparators are platform-specific medians of daily changes in tracked-post counters and require at least 7 valid prior daily pairs. They are directional historical references, not forecasts. Views and impressions are not interchangeable. The table is not an all-account total.

Posts Published Yesterday

Post published yesterday	Yesterday's result	Yesterday's evidence & interpretation
Bills game reaction (FB) (Facebook)	32,000 views	Observed Post publication. Fictional sample metrics for layout review; not actual 10K Takes data. No causal explanation is inferred.
Vikings fan reaction (IG) (Instagram)	18,000 views	Observed Post publication. Fictional sample metrics for layout review; not actual 10K Takes data. No causal explanation is inferred.
Wild comedy skit (TikTok)	9,000 views	Observed Post publication. Fictional sample metrics for layout review; not actual 10K Takes data. No causal explanation is inferred.
Podcast excerpt (YouTube)	2,500 views	Observed Post publication. Fictional sample metrics for layout review; not actual 10K Takes data. No causal explanation is inferred.

Selected rows show a representative subset of verified posts, not every post. Views are distinct from impressions and are reported in their platform's units. Publication-date post totals are cumulative at the next-morning capture; daily platform totals are matched-post counter changes. Unavailable counters are not replaced with zero.

Three Actions For Today - Thursday, November 12

1. Test one comparable fan-reaction post today and record post-level counters at matched post ages.

2. Rework the sample comedy opening and compare platform-native performance after a complete capture interval.

3. Check collection coverage and note any paid boosting before using these sample comparisons.

Confidence & next data checks

Fictional sample data only. Production reports use saved Hub snapshots and explicitly flag unavailable or incomplete measurements.

- Collectors sample posts shortly after midnight. Reported changes are capture-to-capture deltas; counters may include a short collection delay around midnight.
- The post feed covers a limited recent-post set (up to each platform collector's API limit and roughly 30 days). It does not include older posts, so an all-post account impression total is unavailable.
- Views and X impressions are different platform measures and are compared only within their platform.
- Platform baselines require at least 7 valid historical daily comparisons; missing or stale days are not counted as zero.
